Date: March 31, 2020
Re: Temporary Service Technicians

In response to COVID-19, the Oklahoma Department of Agriculture, Food and Forestry (ODAFF) is providing an option for commercial pesticide applicator businesses to gain a temporary certification for service technicians. If your company has a current commercial pesticide applicator's license you will be allowed to submit a certified service technician identification application form for an applicant that has not completed the written examination. The service technician identification will be issued upon receipt of the application and payment of all appropriate fees.

PLEASE NOTE: This is a temporary certification. The service technician's identification shall be issued in the name of the licensed entity. A temporary service technician identification shall only be valid until December 31, 2020, unless otherwise suspended, canceled or revoked by ODAFF or if the service technician leaves the employ of the licensed entity before the aforementioned expiration date.

Complete all necessary fields of the [Service Technician Identification Form](#) and email to pesticide@ag.ok.gov.
