

REPORTABLE DISEASE LIST

OKLAHOMA
Department of Agriculture, Food & Forestry
Animal Industry Services

WHEN TO REPORT:

All reportable diseases must be reported **immediately** to the State Veterinarian's Office upon suspicion of clinical disease. Do not wait for test results to report!

The State Veterinarian's Office can provide guidance to veterinarians on testing, appropriate biosecurity, and additional requirements, as needed.

WHAT TO REPORT:

Any suspected clinical case of a reportable disease, which includes:

- If an animal dies acutely and was exhibiting clinical signs of a reportable disease, this must be reported even if no diagnostic testing was completed prior to death.
- Any highly unusual condition, unusual clinical signs of any kind, and any instance of very high morbidity and/or mortality. This includes **all foreign animal diseases****, or infectious disease or parasite of livestock which was not previously known to exist in Oklahoma.
- All cases of acute equine neurologic disease must be reported immediately, unless cause is known trauma or toxicity.

Veterinary practitioners are the first line of defense in detecting Reportable and Foreign Animal Diseases. We appreciate your interest in protecting Oklahoma's livestock.

HOW TO REPORT:

- > Call the State Veterinarian's Office at **(405)522-6141**. If after hours, the voice message will indicate which staff veterinarian is on call.
- > Call your USDA,APHIS Veterinary Services or ODAFF Field Veterinarian

ALL Foreign Animal Diseases **

Anthrax *

Avian Influenza and Newcastle Disease *

Bluetongue

Brucellosis *

Bovine Spongiform Encephalopathy (BSE)

Chronic Wasting Disease (CWD)

Contagious Equine Metritis (CEM)

COVID-19*

Coxiella burnetii (Q Fever) *

Epizootic Hemorrhagic Disease

Equine Encephalitides (EEE, WEE) *

Equine Herpes Virus

Equine Infectious Anemia

Equine Piroplasmiasis

Equine Viral Arteritis

Fowl Typhoid (Salmonella gallinarum)

Infectious laryngotracheitis

Johne's Disease

Leptospirosis (canine) *

Malignant Catarrhal Fever

Mycoplasma (gallisepticum and synoviae)

Plague *

Psittacosis *

Pseudorabies

Rabies *

Salmonella (pullorum or enteritidis)

Scabies (cattle or sheep)

Scrapie

Tuberculosis *

Tularemia *

Vesicular Diseases

Vesicular Stomatitis

West Nile Virus *

* Diseases of public health significance. Should report to Oklahoma State Department of Health as well as ODAFF

** OIE List of Reportable Diseases: <https://www.oie.int/animal-health-in-the-world/oie-listed-diseases-2020/>

CHARACTERISTICS OF A REPORTABLE DISEASE:

High mortality
High morbidity (rapidly contagious)
Vesicular Lesions
Severe respiratory conditions
Neurologic symptoms

Does not fit the normal clinical picture
Severe abortion storms of unknown etiology
Hemorrhagic septicemia
Suspicious necropsy findings
Poor or no response to treatment as expected
