

Cooperative Agricultural Pest Survey
Annual CAPS Meeting- June 13, 2013

Oklahoma State University,
Noble Research Center, Room 130
Entomology & Plant Pathology Conference Room

AGENDA

1. Welcome and Introductions
2. CAPS Introduction- Mission and Strategy
3. 2012 Year Overview, Survey Results & Maps
 - a. Emerald Ash Borer
 - b. Wood Commodity- Oak & Pine
 - c. Pecan Disease
 - d. Red Imported Fire Ant
 - e. Karnal Bunt
 - f. Thousand Canker
4. 2013 Update- What has been done so far?
 - a. Emerald Ash Borer
 - b. Wood Commodity- Oak & Pine
 - c. Red Imported Fire Ant
 - d. Karnal Bunt
 - e. Thousand Canker
5. 2014 Discussion
 - a. What's new in CAPS
 - b. CAPS in other states
 - c. NAPIS- Consensus Data
 - d. Ideas for 2014 Survey
 - e. Outreach Ideas

Discussion Questions

Invasive Pests and Survey

1. With funding cuts, is this type of surveying worthwhile? How can we do more to maximize our efforts? What are our state's main goals with CAPS?
2. What invasive pests are important to your area of expertise? Nurseries, forestry, row crops?
3. If funding was not a limiting factor, what surveys would you like to see conducted?

Outreach

1. Can we use outreach as a means to maximize our efforts in CAPS?
2. Are volunteer surveys and citizen science a feasible option?
3. How can communication between stakeholders be improved? New research, early detection, first line of defense for pest outbreaks?
